Work experience

Started web development back in 2008 for own & freelance projects, with some pauses later. My commercial experience began from 2013 until now:

Dec 2017 — Now

Own side-project on junction of media & archive.

Technologies: Golang, Python, PostgreSQL, Scrappy, Docker, Selenium WebDriver.

Jun 2016 – May 2018

Alfa-Bank (Moscow, Russia)

Worked as lead UI engineer in design system team at Alfa-Laboratory, digital experimental department of Alfa-Bank, one of the largest private commercial banks in Russia. During my work I successfully redesigned bank's web front-end platform in accordance with focus on mobile and launched Alfa-Bank Design System web portal (<https://design.alfabank.ru/>). I've created and supported some inner services (mailing constructor, image processing). Being maintainer, I took part of open sourcing main UI and other JS libraries of bank's front-end ecosystem, which were foundation for over 40 projects/teams for those days. I've helped teams to adopt common libraries in projects. Also there was redesign of Passport project with field research and usability testing. I've audited the performance of front-end apps, embedded in Alfa-Mobile native app, and n-times improved critical RAIL model metrics.

Keywords: JavaScript (incl. Node.js), Golang, React, Redux, Hapi, Webpack, Unit & regression testing, CI/CD, Docker, UI/UX, Design systems, OSS, Agile/Scrum.

Apr 2013 – Jun 2016

Manufactura (Voronezh, Russia)

Over 39 months of working at Manufactura I participated in 39 projects of different complexity. I started as an front-end developer and grew to a web development team lead. I interviewed about a dozen applicants, took part in adaptation of new employees and training interns. One of the main cases of the studio are news media sites. I was involved in development, launching and support of large federal, thematic and hyperlocal media.

My key technologies over all years in company was: JavaScript (ES 5-7, incl. Node.js), Yandex BEM stack, Ruby on Rails. Among the variety of workflow methodologies at company we strongly preferred Kanban. Below is a selective list of projects available online (in chronological order): mer-voronezha.ru, tass.ru, polavkam.ru, ihvoronezh.com, форумсообщество.рф, inde.io, factory.mn.

Education

My education isn't in CS, but helps me to keep broad outlook:

2007–2012, Bachelor

Voronezh State University

Faculty of Geography, Geo-Ecology and Tourism

2004–2005

Voronezh State University

Faculty of Philosophy and Psychology
